

## 9.27.12. Vinyl Siding

### Elevation

#### 9.27.12.1. Material Standard (Vinyl Siding)

The standard for vinyl siding should provide for effective resistance to the entry by precipitation or snow-melt into the exterior wall assembly. Resistance to wind forces and exposure effects such as freezing and thawing must also be provided. Vinyl siding, including flashing and trim accessories should conform to CAN/CGSB-41.24: "Rigid Vinyl Siding Soffits and Fascia".
